Training the GIS Professional

Introduction to your ArcGIS Online Subscription - 2 days

Overview

This two day course will introduce you to ArcGIS Online. Through a combination of lectures and demonstrations you will learn how to use your ArcGIS Online subscription.

We will step through the different methodologies when working with ArcGIS Online within the ArcGIS Platform; recommending workflows for authoring, sharing, managing and working with your GIS data, be they hosted online or within your corporate ArcGIS Enterprise.

The course will contain a number of exercises for you to work through on the day. You will be provided with the data and exercises that the trainer uses to deliver the course so that you can work through them in your own time.

Who should attend

- GIS Professionals
- New Users

Goals

- Return to the office with the confidence to produce useful information products using an ArcGIS Online subscription.

Topics Covered

- Load, Create and Manage spatial data
- Author, configure and share Web Maps and Web Applications
- Share content using Groups
- Use online geoprocessing tools
- Make use of ArcGIS Field Maps to collect data

Prerequisites

- Familiarity with ArcGIS for Desktop would be an advantage
